

YOUR ULTIMATE GUIDE FOR RETURNING TO WORK TODAY AND PLANNING FOR TOMORROW

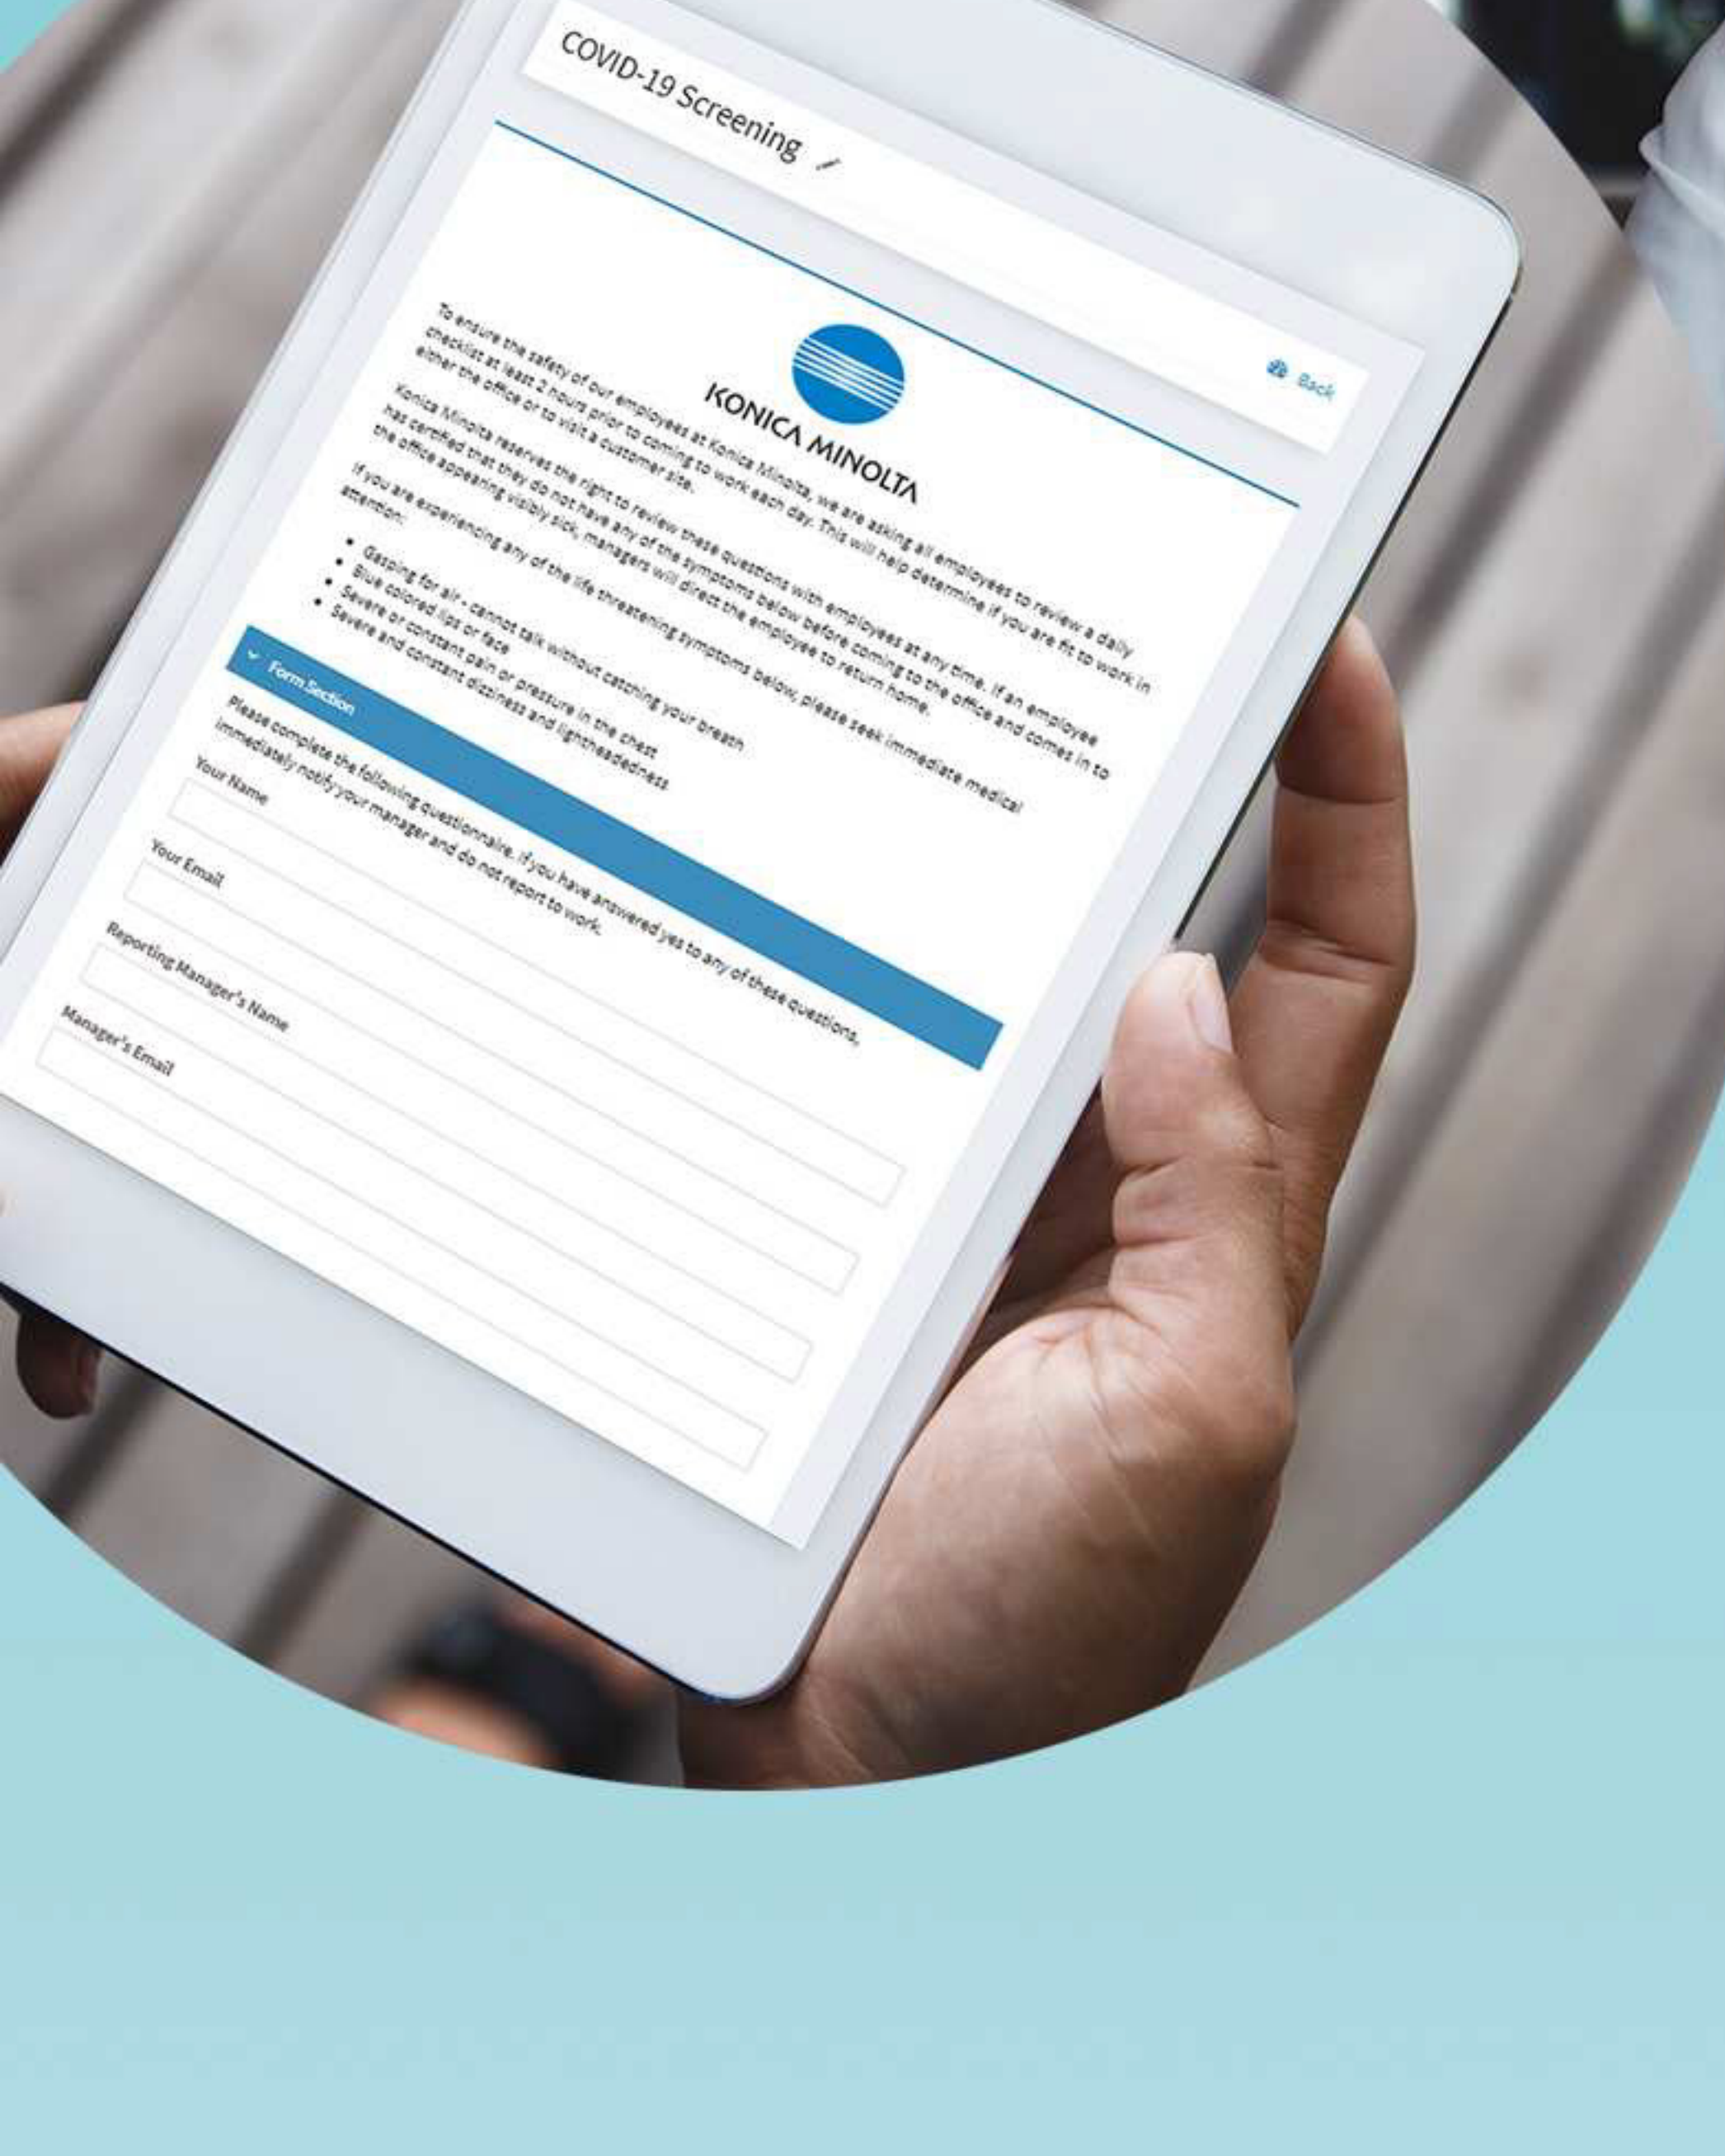

As your employees start to return to work, here are the essential steps to consider to implement to ensure statutory compliant processes, secure data management, employee well being and uninterrupted business operations.

1 Employee is notified to complete Virtual Health Check before heading to the office

Based on the response, the employee is either advised to:

- 1) stay at home
- 2) return to work

If advised to return to work, the employee will move to a Second Level screening with a MOBOTIX Thermal Camera

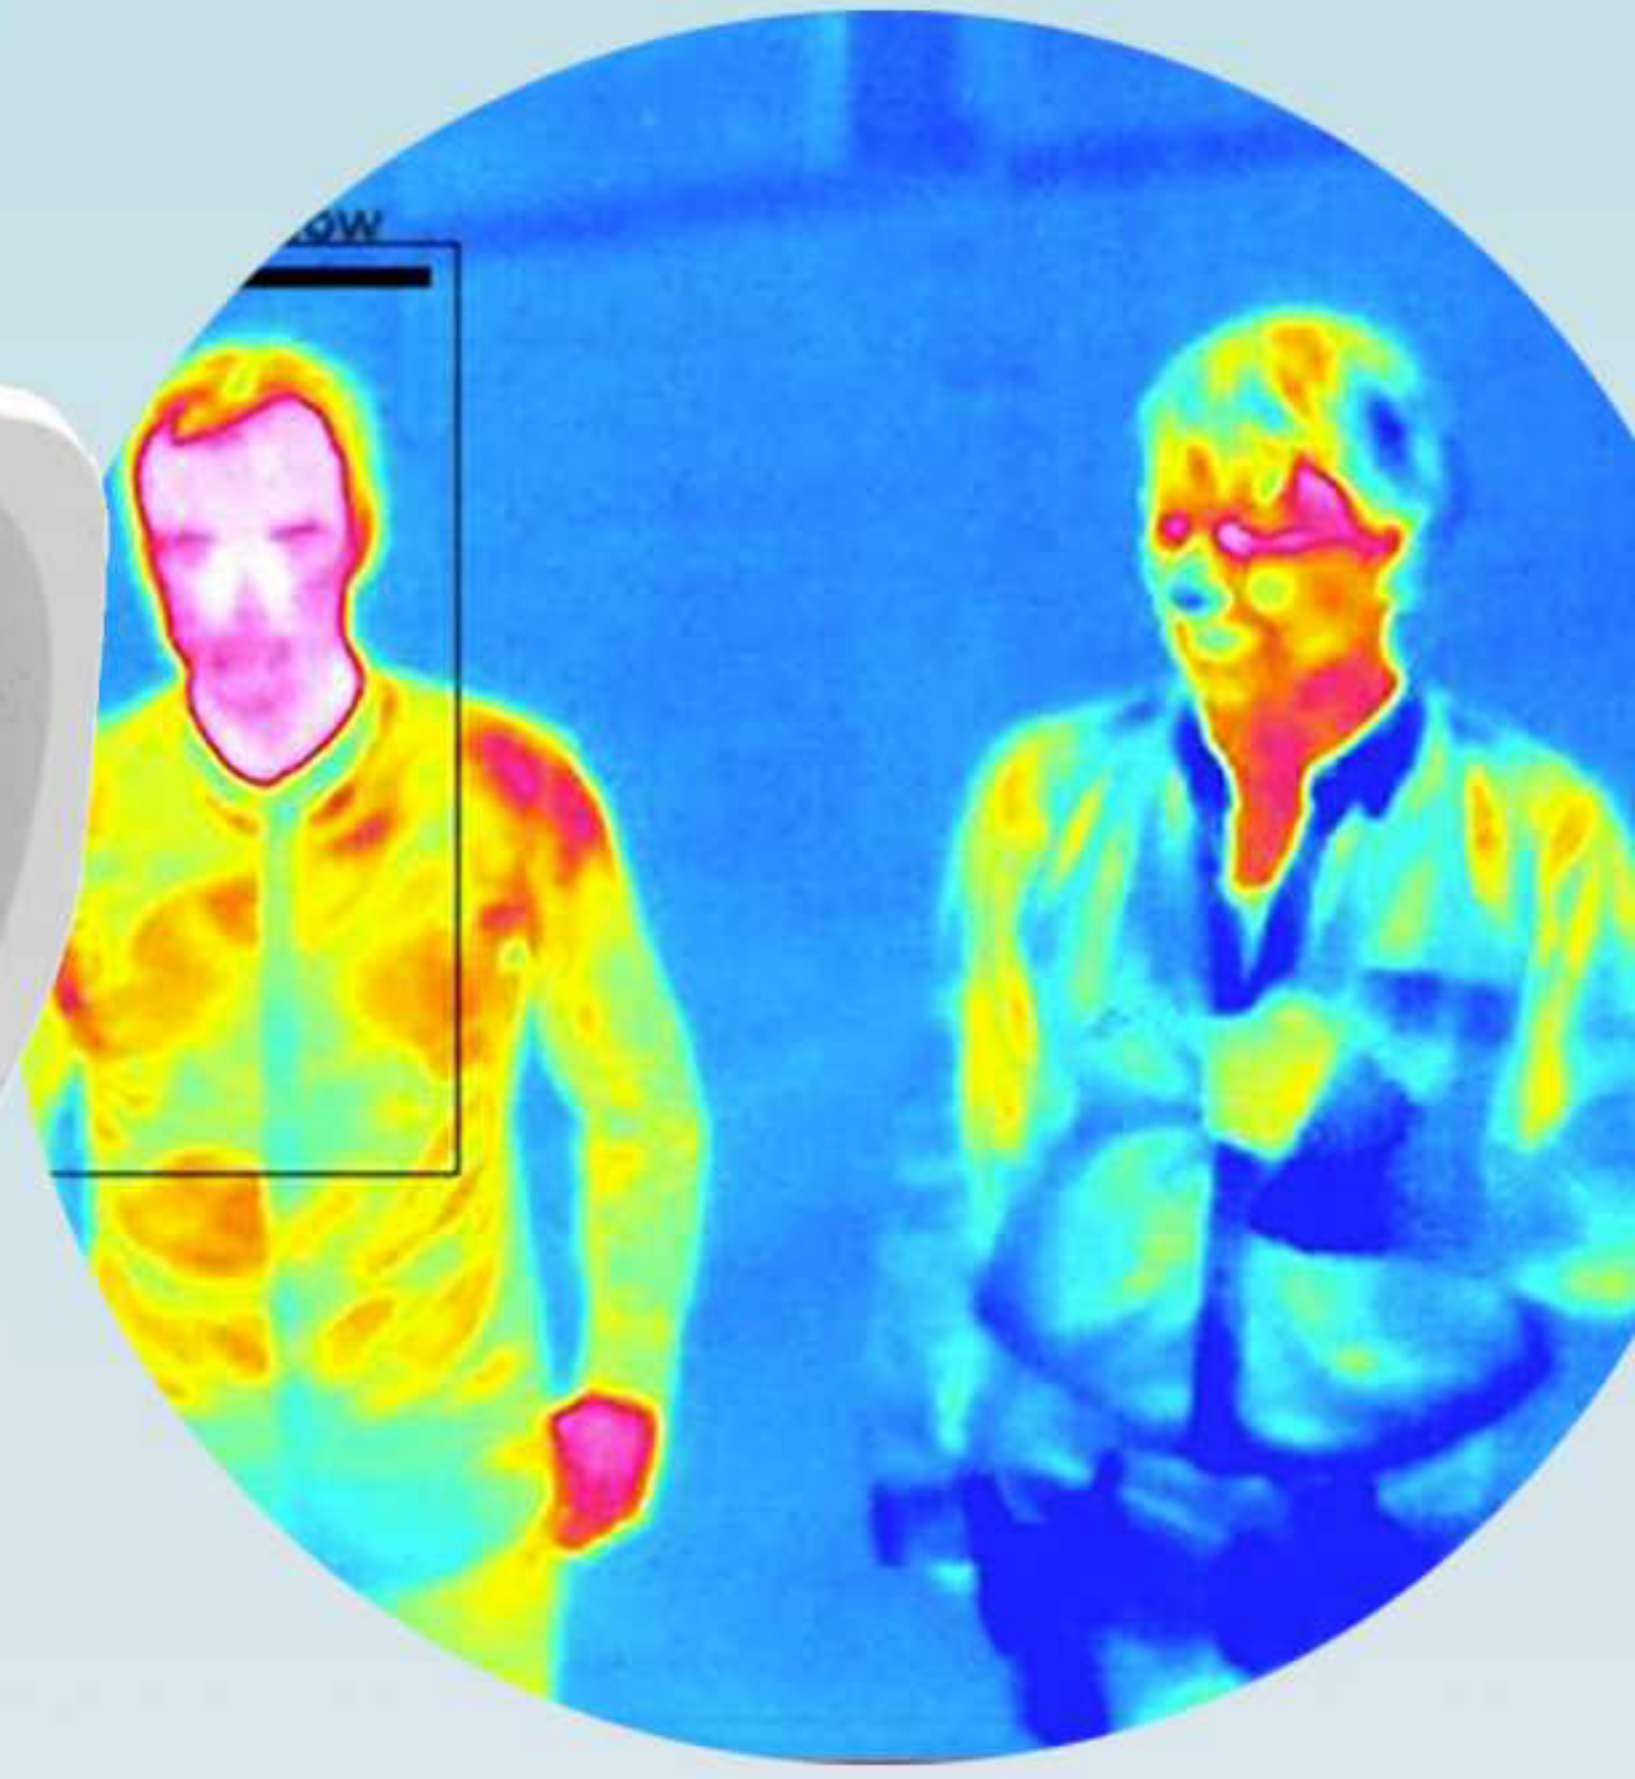

2 MOBOTIX Thermal Camera-Second Level Screening

If results are **out of compliance** with company guidelines, employee proceeds to Third Level Screening for extended temperature verification

If results are **in compliance** with company guidelines, employee is automatically granted workplace entry access

3 Contactless Temperature Verification - Third Level Screening

If results are **out of compliance** with company guidelines, HR advises the employee per company policy (e.g., go home) and results are stored securely via our Content Management system

Employee health check data is maintained and workplace entry is granted

4 Incident Management Reporting & Contact Tracing

Data from forms, screenings and HR records can be stored electronically for:

- Retrieval
- Review
- Incident Management
- Internal/External COVID Reporting
- Contact Tracing
